

# MEETING REPORT

Team Name: \_\_\_\_\_EPOKISTET\_\_\_\_\_ Date of Meeting: \_29.03.2018\_

Start Time: \_\_18.00\_ End Time: \_19.30\_ Meeting Location: \_\_Tirana\_

Moderator: \_\_Erida Nurce\_\_ Recorder: \_\_Giuliano Ballshi\_\_

Other Members Present: \_\_\_\_Jorgel Keci\_\_\_\_\_Elvi Cela\_\_\_\_

Members Absent: \_\_ (NONE) \_\_\_\_

## Topics Discussed:

### MEETING WITH MUNICIPALITY

Today we had the group meeting, after having a long discussion with representatives of Tirana Municipality. We got to know some of the requirements that the representatives would like our platform to include, in order for it to be really beneficial to their work. Some of them included having a functionality that the users could have the option to report something to the Municipality Police, for example nuisances and loud noises.

Moreover, they liked and supported our idea of linking the buildings and people that live in that building, with the respective address. For this we were presented the option of having the Municipality's database of street names and building numbers in the respective streets. After the meeting with the representatives, we also had a further discussion with the group, on how we would go about solving the problem of linking the users to the map, and also how we would open an account for every user in the building, given the problem that many users might not be tech savvy, and might choose the wrong street on which they live.

We thought of having some sort of authentication method, such as the building administrator would have to confirm the accounts of users in that building. However, we will wait for another meeting next week with the representatives of the Municipality, and ask them more questions on how they would like to solve these problems. We also discussed some visual aspects of the login and sign up of the administrator part of the software.
